Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/19/06 and 2/8/07 has been entered.

Election/Restrictions

Claim 10 is allowable. Claim 33, previously withdrawn from consideration as a result of a restriction requirement, requires all the limitations of an allowable claim. Pursuant to the procedures set forth in MPEP § 821.04(a), **the restriction requirement between inventions II, as set forth in the Office action mailed on 2/17/05, is hereby withdrawn** and claim 33 is hereby rejoined and fully examined for patentability under 37 CFR 1.104. In view of the withdrawal of the restriction requirement, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Response to Arguments

Applicant's arguments, see page 3, filed on 12/19/06, with respect to claims 10, 32, 49 and 50 have been fully considered and are persuasive. The rejection of 112 2nd has been withdrawn.

Applicant's arguments, see pages 4-6, filed on 1/18/07, with respect to claims 8 and 54-57 have been fully considered and are persuasive. The rejection of Erny '465 has been withdrawn.

Allowable Subject Matter

Claims 6 and 47-48 are allowed from the previous office action.

The following is an examiner's statement of reasons for allowance:

The claims are patentable over the prior art of record because the teachings of the references taken as a whole do not show or render obvious the combination set forth in claims 8 and 10, including all of the structural elements recited in the claims, especially in claim 8, the concept of the latch with a latch component deflecting contact with a latch reception supported by the spindle such that a rotation of the spindle causes the film roll replacement position to dispenser mode position automatically moving the latch into a latch state following deflection; especially in claim 10, wherein the spindle has two axially spaced film roll mounting surfaces of different diameter, one side having a bigger diameter than the other end of the mounting surface with mounting surfaces are dimensioned relative to cores inserts of the film roll, and the core inserts

Art Unit: 3654

are dimensioned of different sizes so as to limit mounting of the film roll in only one axial orientation, which prevents the user from mounting the film roll incorrectly.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
